Rainfall 2019

1 inch = 15,631 feet

Made By: JMWatt@HSWCD
 Data: OGRIP OSIP DEM

2019 Rainfall . . .Highs and Lows

The Huron County Rainfall Report is prepared by the Huron Soil and Water Conservation District using records kept by volunteer recorders located across Huron County from April through September. This was the 43rd year that data was collected, and this rainfall report compiled.

In 2019, September was the driest month *averaging* only 2.5 inches of rain, while June was the wettest month averaging 7.2 inches of rain.

The *2019 growing season average* was 26.8 inches of rain. The *2019 percent of average* was 100% over the 43 years of recording. The 43 year average since 1974 was 23.3 inches of rain.

The Huron Soil and Water Conservation District would like to thank all the people who took the time to record this year. Rainfall should be recorded to the nearest tenth. As you can see on the map, there are still parts of the county that recorders are needed. If you have the time and would like to record the rainfall, please fill the form at the bottom and return it to Huron S.W.C.D., 8 Fair Road, Norwalk, OH 44857.
