

2025 SPRING FISH SALE

The prepaid, order deadline is April 2, 2025. The one time pickup begins at 12:30 p.m. Thursday, April 10, 2025, in the parking lot of our building located at 8 Fair Road, Norwalk, OH. Please arrive no later than 2:30 p.m. for pickup of the presold fish for pond stocking.

You must bring buckets (5 gallon pails work great) lined with *unscented* poly trash bags, 1/3 filled with water from the pond that your are going to stock. Do not use lids. Fenders Fish Hatchery will inject oxygen in the bags and tie the bag with twine for transport.

A five gallon bucket will transport 100 small fish, four to five large fish, or 1,000 minnows.

2025 SPRING FISH SALE

	HABITAT/ ABOUT	FOOD	INITIAL STOCKING	ADULT SIZE
Black Crappie	Stocked in many lakes and reservoirs around Ohio; close to surface at dawn; prefer stony or hard bottom to lay eggs	Feed on fish and insects	100 per acre along with bass and bluegill; restocked every 3 to 5 years	12" to 14"
Largemouth Bass	Found in ponds, lakes, and slow sluggish streams in every county in Ohio	Adults eat crayfish, frogs, large insects, and fishes	100 per acre	12" to 15"
Bluegill	Common throughout Ohio but prefer clear ponds and lakes with vegetation	Insects, insect larvae, small fish, fish eggs, and plant materials	500 per acre	6" to 10"
Hybrid Bluegill		Insects and small fish	100 per acre, because they have a 1% reproduction rate; stock with bluegill	Length of parent bluegill and aggressiveness and thickness of the green sunfish; up to 11"
Channel Catfish	Common in most large streams and lakes throughout Ohio; found in greatest numbers in deep water, clean gravel and boulder substrates	Insect larvae, crayfish, mollusks, and small fish	100 per acre	12" to 14"
Perch	Found in Lake Erie and impoundments, ponds, slow moving rivers throughout Ohio. Prefer clear water with moderate vegetation	Adult aquatic insects and larvae, and small fishes	100 per acre (need brush piles and screen overflow to protect perch)	5" to 12"
White Amur	Rapidly moving waters or where adequate food supply exists	Leafy, aquatic plants such as pondweed, coontail, floating duckweed, and cattails	Vegetation: <i>Light:</i> 3 to 5 amurs per acre <i>Moderate:</i> 6 to 10 amurs per acre <i>Heavy:</i> 11 to 15 amurs per acre	3' to 5' long and up to 100 lbs.
Japanese Koi	Originated in 18th century Japan; Popular in USA for 50 years	Duckweed and water-mill	10 to 12 per acre	8" to 9"
Redear Sunfish (shellcracker)	Not native to Ohio; found primarily in clear, warm waters with vegetation	Snails and other mollusks, crayfish, insects, insect larvae, and small fish	250 per acres + 250 bluegill per acre	9" to 11"

2025 SPRING TREE SEEDLING SALE

Transplants are bareroot plants that have had their root system pruned and planted back in the ground. This greatly increases the survival when again dug and planted. A 2/3 transplant has spent two years in a seedling bed and three years in a transplant bed. These have excellent survival when given good weed and grass control, and they are easy to plant. **First Come, first serve. Order while supplies last!** The pickup location is as it has been the last few years behind our office in the new pole building located at 8 Fair Road in Norwalk, OH. We will have only a one day pickup during business hours **8:00 a.m. to 3:30 p.m. on Friday, April 18, 2025.** Please plan to have your prepaid orders picked up on the specified date for best survival of your seedlings. **ORDER NOW!! PREPAID ORDERS ONLY BY CASH OR CHECK TO HURON SWCD, 8 FAIR ROAD, NORWALK, OH 44857**

THE DISTRICT SURVEYOR

2025 SPRING SEEDLING INFORMATION

	<p>American Arborvitae (<i>Thuja occidentalis</i>)</p>	<p>Narrow, pyramidal shaped evergreen that can be used as a hedge or windbreak. It is a slow to medium grower with a mature height of 40' to 60'. It prefers full sun and acidic, clay, loamy, moist, rich, sandy, silty loam, well drained soil. It provides shelter to wildlife and seeds for birds and squirrels.</p>
	<p>Norway Spruce (<i>Picea abies</i>)</p>	<p>This pyramidal, pendulous branched evergreen grows between 40' and 60' in height and by 25' to 30' spread. It is considered medium to fast growing. It bears 4" to 6" long cones. It performs well in moist, sandy, acidic, well drained soils in full sun to very light shade. It is commonly used as a windbreak.</p>
	<p>Tulip Poplar (<i>Liriodendron tulipifera</i>)</p>	<p>This tree is a member of the magnolia family. It produces tulip shaped, light greenish yellow flowers April to June. It is rapid growing and reaching heights of 80' to 120'. It does best in moist, deep, well drained soils. Requires full sun, but can tolerate partial shade.</p>
	<p>Paw Paw (<i>Asimina triloba</i>)</p>	<p>Also known as the Poor Man's Banana or Hoosier Banana. It is a deciduous, often narrow, conical, tree growing 12' to 25'. The dark green leaves grow up to 12 inches in length. In March to May they produce maroon, upside down flowers that measure up to 2 inches across. The large edible fruit is produced, often in clusters from the blooms. Its taste is described as a cross between a mango and a banana. Harvest time is mid August to mid October. It should produce fruit in 5 to 6 years. It grows best in full sun once established. Plant in deep, fertile soil that is well drained and slightly acidic.</p>
	<p>American Redbud (<i>Cercis canadensis</i>)</p>	<p>For many years, this is the seedling preferred for our Annual 2nd Grade Arbor Day Program. It has a medium growth rate, growing to 20' to 30' in height with a 25' to 35' spread. It is a small tree producing rosy pink to purplish flowers in March to April. Young seedlings should be planted in moist, well drained clay, loam or sandy soils and in full sun to partial shade.</p>
	<p>White Walnut (<i>Juglans cinerea</i>)</p>	<p>Also know as butternut. The white walnut grows rapidly on well drained, moist rich soils of hillsides and streambanks. The white walnut's nuts are sweet and edible. It prefers full sun to partial shade.</p>
	<p>White Oak (<i>Quercus alba</i>)</p>	<p>It grows 50' to 80'. It has dense foliage that is bluish-green, to reddish-brown in autumn. It grows best in a deep, loamy, well drained soil. It is the tree from which the phrase 'Mighty Oak' was coined. It is known for its broad, round head, and massive, wide spreading, branches. It is an excellent specimen tree needing plenty of room to mature properly. Also, it is the most prolific lumber oak in the Northern Hemisphere. They are a long lived tree, and require very little maintenance. Native to eastern to mid United States. Full sun, partial sun/shade preference. Slow to medium growth rate. The acorns provide a source of wildlife</p>
	<p>Hybrid Poplar (<i>Populus deltoides x Populus nigra</i>)</p>	<p>Extremely fast growing, cotton less shade growing tree up to 80 feet. Dark green leaves, spring through fall, turning yellow in the fall. Long lived. should be kept mowed and weed-free. Plant 50 feet away from drains and sewers. Full sun preference and acidic, alkaline, wet soil preference.</p>
