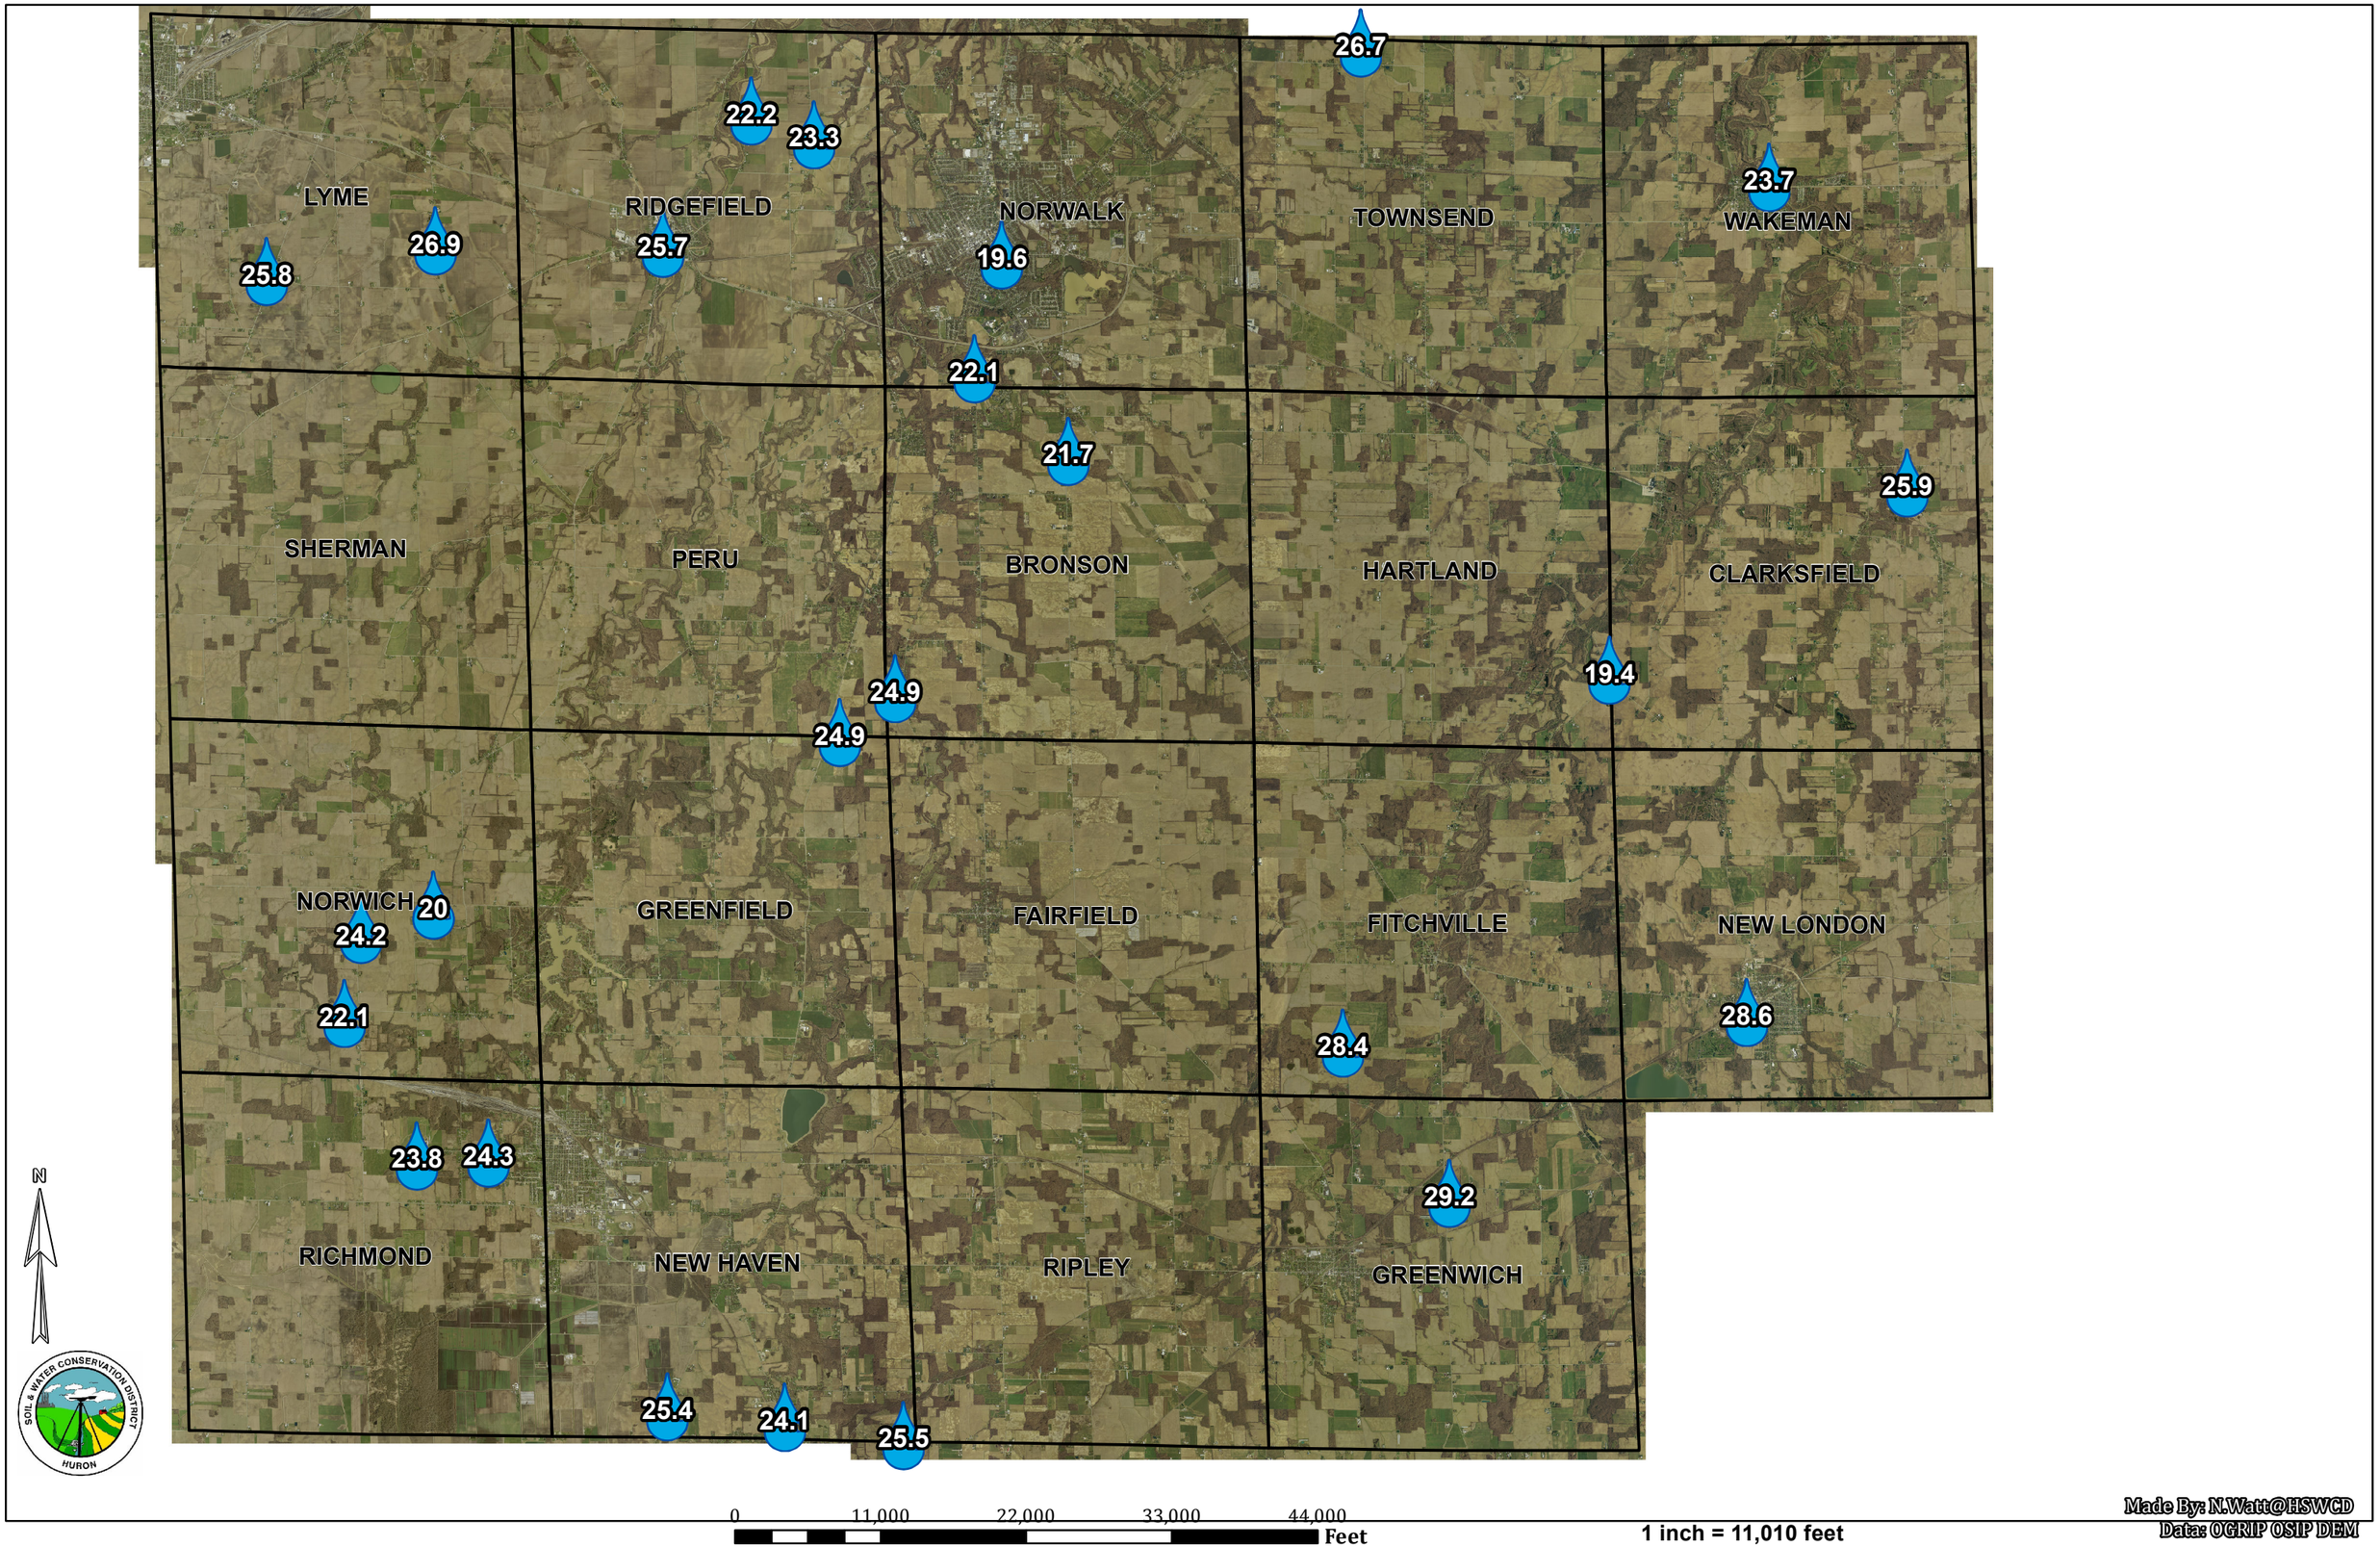
Rainfall 2025



Made By: N.Watt@HSWCD
Data: OGRIP OSIP DEM

2025 Rainfall . . .Highs and Lows

The Huron County Rainfall Report is prepared by the Huron Soil and Water Conservation District using records kept by volunteer recorders located across Huron County from April through September. This was the 49th year that data was collected, and this rainfall report compiled.

In 2025, September was the driest month *averaging* only1.2 inches of rain, while June was the wettest month *averaging* 5.8 inches of rain.

The *2025 growing season average* was 24.3 inches of rain. The 2025 *percent of average* was 104% over the 49 years of recording. The *49-year average* since 1974 was 23.4 inches of rain.

The Huron Soil and Water Conservation District would like to thank all the people who took the time to record this year. *Rainfall should be recorded to the nearest tenth.* As you can see on the map, there are still parts of the county that recorders are needed. If you have the time and would like to record the rainfall, please fill the form at the bottom and return it to Huron S.W.C.D., 8 Fair Road, Norwalk, OH 44857.
